- Supported the team in maintaining organized datasets.

OLA Data Analytics

Analyzed OLA ride data using MySQL, for querying and Power BI for interactive dashboards.

Created visualizations to track ride trends, revenue, payment methods, and customer behaviors.

CLEAN INDIA

Problem: Garbage often overflows from dustbins and makes nearby places dirty..

Solution: in the Cleanindia project, a person can take a photo of the garbage and upload it on the website

Automatic Location: The system automatically detects the latitude and longitude, so the user does not need to enter the location.

Action by Authority: The Municipal Corporation. can see the location on a map and quickly clean the garbage
